**ForTheRecord® (FTR) unveils TheRecord Online and FTR Touch at  
Court Technology Conference**

**Phoenix, AZ, 24 September, 2009** — ForTheRecord (FTR), a leading provider of digital recording and content management solutions for judicial and public safety venues, today unveiled two new products – software-based TheRecord™ Online and FTR Touch™ – at the 11<sup>th</sup> bi-annual Court Technology Conference held in Denver, Colorado.

TheRecord Online is a web-based solution that facilitates transcription order fulfillment through online collaboration between Courts, Requestors (such as Attorneys) and Transcription Service Providers, thus streamlining the overall transcript creation process. Among other benefits, users of TheRecord Online can save time, lower costs and enjoy greater flexibility and process efficiencies.

FTR Touch combines touch-screen hardware with a modified version of FTR's flagship FTR Gold recording software and delivers key features such as multi-channel recording, time-and-date stamping, confidence monitoring and compatibility with FTR Log Notes® software, to both new and existing Court customers. The elegant, touch-screen hardware platform is the foundation of FTR Touch and provides several additional benefits including a simplified workflow, shortened operator training, reduced user errors and enhanced supportability.

Both TheRecord Online and FTR Touch are expected to be released in the first half of 2010.

"TheRecord Online and FTR Touch represent a new era of technology solutions from FTR," said Gunnar Light, Executive Vice President of FTR. "They continue to represent our focus on reliability and ease-of-use, while expanding the company's commitment to content management and new services."
